

Securing a more dynamic, innovative and inclusive future

Quality technology audits from KPMG LLP

“The pace of change creates opportunities, but also challenges for management and audit committees. Through this multi-dimensional effort, KPMG LLP is positioned to bridge gaps, deliver actionable insights, and enhance audit quality to give leaders the confidence to fully embrace technological change.”

Heather Paquette National Tech Assurance Leader - Audit

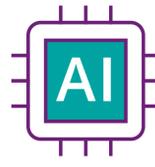

74%

of CEOs are increasing the digitization of their operation

2/3

of CEOs are augmenting their workforce with automation and artificial intelligence

1/2

of business leaders and government decision-makers said AI is functional at their organization

Technology's promise also comes with new risks across industries.

ESG

80% of companies -- 96% of the world's largest 250 companies and 90% of North American companies -- report on sustainability.

BLOCKCHAIN

Nearly half of the business leaders say blockchain will likely change the way they do business.

CYBER

CFOs and Audit & Compliance Committee Chairs highly prioritize cybersecurity while their other priorities diverge.

CLOUD

Nearly 90% of respondents expect all their workloads to be autonomously updated within three years.

DIGITAL

Nearly half of CEOs said the pandemic sharply accelerated progress in creating seamless digital customer experience.

ERP

Less than half of organizations leverage automated controls for their ERP controls.

“We are upskilling our professionals to not only meet market demand for technology assurance and attestations, but to create the capacity and structure to go deep and innovate to stay ahead. We are laser focused on meeting the need for complex attestations of AI, ESG, cloud, blockchain and more.”
